(54) Title: AUTOMOBILE LIFTING JACK

(54) Título: GATO ELEVACOHES

(57) Abstract

The invention relates to a Y-type automobile lifting jack having an arm-support (2) and a supporting arm (1) in which the former rotates. The arm (2) has a jaw on its free end for receiving an edge of the body of the vehicle and the supporting arm has a tilting supporting leg rotating around an axis substantially parallel to the axis of the arm-support. A bar (23) is fixed to the other end of the arm-support (2) extending through the supporting arm (1) into the base of the supporting arm (1) and entering between the base of the end of said arm (1) and the bottom of the leg (3) contacting said leg.
